1. The amendment filed on 12/22/03 has been received and entered in the case.
2. The disclosure is objected to because of the following informalities: on page 8, line 1, "is" should be deleted. On page 9, line 11, "Figure 1" should be changed to --Figure 2-- (because no "comparator K2" is illustrated in instant Fig. 1). Appropriate correction is required.
3. Claims 19-21 are objected to because of the following informalities: in claims 19 and 20, line 5 of each, "second" should be deleted. Note the same type of change is need in claim 21, lines 3, 6 and 9. Appropriate correction is required.
4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 18-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Andoh et al.

Art Unit: 2816

As to claims 1 and 18, note Fig. 1, where the recited "first input" reads on the terminal connected to the gate of FET 11 which receives the single-ended data input V_{REF} ; the recited "second and third inputs" read on the terminals connected to the gates of FETs 8 and 9 which receive the differential signal formed by V_{out+} and V_{out-} ; and the recited "receiver" reads on circuit 13.

The limitations of claims 19-22 are deemed to be inherent since the claimed structure is fully anticipated by Fig. 1 of Andoh et al, see MPEP sections 2112 through 2114 and In re Best, 195 USPQ 430.

5. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Note Fig. 4 of Alexander et al, which appears to anticipate at least independent claims 1 and 18 as well.

Art Unit: 2816
